

The Fecon SKIDSTEER STUMP HOG

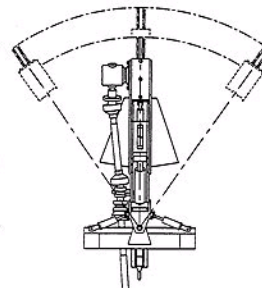

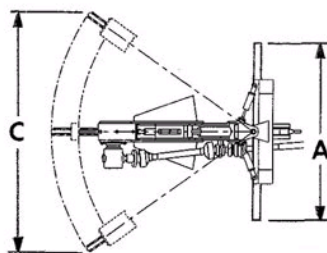

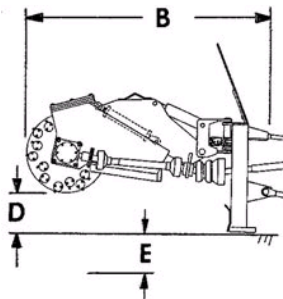

Fecon's SH260 Stump Hog is a severe duty stump cutter for the true professional. It is ideal for Hi-Flow Skidsteers. An optional Honda Gas Pony motor is also available for lower flow machines. This allows moderately high flow skidsteer loaders to obtain satisfactory performance. The pony motor powers swing, lift, and extend allowing all high flow oil to go directly to the wheel motor.

SS260SSP STUMP HOG
