

**WOOD HUNTER**

Cutting Width	Overall Width	Height	Depth	Weight	# of Teeth
60" 152 cm	70" 177 cm	57" 144 cm	46" 117 cm	2,342 lbs 1062 kg	28

The Wood Hunter mulcher has a high torque variable, 160 cc displacement bent axis motor rated at 380 hp. It will reduce hydraulic oil temperature which extends hoses, o-rings, pumps and motor life. The motor will also adjust to accommodate different pump flows.

The teeth, steel or carbide, are easy to access and are rotatable for reduced cost and longer life. Your mulcher will perform like more horsepower has been added because less cutting effort is required. Less cutting effort equals fuel savings and less wear on the machine. There are several styles of teeth to withstand the toughest conditions.

Maintenance is simple! Only takes minutes to disassemble and reassemble. Has high torque poly chain belt drive.
