

The Predator Stump Grinder manufactured by Ryan's is designed for the high flow, high horse power skid steers. Built for demanding high production use and features a heavy duty bull dozer style push blade, less hydraulics and allows the operator to grind in the comfort and safety of your cab.

Optional chip curtain contains majority of the flying debris. Less clean up time and protects the surroundings! Curtains can be folded back for transport.

Model FX-24 is also available for larger mini excavators.
